A paid order is durable truth. A provider problem changes fulfillment state — it never invalidates the payment.

HOW FULFILLMENT WORKS HERE

Stocked items land in Ready to Ship. Copy the address into Pirate Ship, buy postage there, then record the tracking number here.

Manual supplier items create a Supplier Order task. Opening the supplier's site changes nothing — only Mark as Submitted does, and it needs their reference number.

Submitted is not shipped. Tracking entry is a separate step, and it is what notifies the customer.
